

All-Arts, Sciences + Technology Camp

The **All-Arts, Sciences + Technology Camp** is a week-long summer camp for kids ages 7–15. Designed to give in-depth, hands-on instruction in the arts, sciences, and technology, the camp also includes recreation, citizenship, and multi-cultural entertainment. Each camper attends a morning class and an afternoon class, that you choose from a wide variety of course offerings. Our class sizes are small and the curriculum encourages problem solving and critical thinking.
